Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s). _____
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other:

1. This Office action is responsive to the election (Paper No. 4) filed June 3, 2003 wherein the claims of Group II, 17-30, were elected for prosecution in the instant application without traverse. Claims 1-16 stand withdrawn by the Examiner as being part of the non-elected invention.

2. The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 17-30 are rejected under 35 U.S.C. § 103(a) as being unpatentable over either one of Ulland et al. or Chan.

Both of these references describe, teach and suggest the basic requirements of the instant invention as claimed. Specifically, see the claims of each document and the drawings of each publication. It is clear when reviewing these passages of the references that a substrate exposure method, to transfer a pattern to a photoresist on the surface of a substrate is described. Furthermore, it is clear that a scanning light source is being utilized at a distance from the photoresist surface. This scanning light source comprises a plurality of point light

sources. There is also a control system to determine the light and dark status of each point of the light at different times. However, it is not clear whether or not a "scan" type of exposure is within the metes and bounds of these documents. Based on this fact, a 35 U.S.C. § 102 rejection of anticipation is not being made. However, one of ordinary skill would have found it prima facie obvious to perform a scanning light exposure with these types of exposure devices as set forth in the Ulland et al. and Chan references, absent objective evidence of high probative value to the contrary. This is motivated by the fact that scanning type exposures are well known in the art and one of skill in the art would have found it prima facie obvious to utilize these devices in a scanning manner.

4. The additional references cited on the PTO-892 set forth the state of the art for programmable masks.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher Young, whose telephone number is (703) 308-2984. The examiner can normally be reached on Monday through Friday from 8:30 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff, can be reached on (703) 308-2464. A Fax communication that is for a non-final fax should be sent to (703) 872-9310. An after final fax should be sent to (703) 872-9311.
